

DRAGON

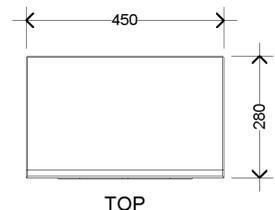

Fire-Dragon is a 3-way active speaker designed to be a front LCR speaker for commercial cinemas or larger private home cinemas. Fire-Dragon uses commercial grade Neodymium bass and compression drivers to ensure high power handling, low heat soak and reduced power compression under any conditions. The high and mid compression drivers are dual concentric, which provides incredible phase coherence and allows extension down to 500Hz. The cabinet design and a high flow port design provides increased bottom end power. Fire-Dragon sits on its hoard and is the undisputed king of power and dynamics. Especially designed for Concert level playback, Fire-Dragon is an experience never to be forgotten.

All Elementi speakers are digital active and benefit from floating 32 point DSP processing, digital crossovers, FIR filters with correction in the frequency and time domains, look forward speaker protection, high flow PASCAL amplifiers and high quality D/A converters. All amplifiers are specified with 3dB of headroom at maximum output to ensure there is no clipping or general distortion. Each speaker is custom tested and run in to ensure optimal performance out of the box.

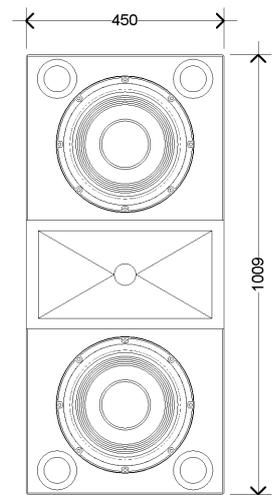

SPECIFICATIONS

DESCRIPTION:	3 Way Active
USE:	Front LCR
ORIENTATION:	Vertical
HF DISPERSION:	90° Horizontal & 40° Vertical
LF SECTION:	Dual 12" Neodymium
MD SECTION:	3.5" Compression Neodymium
HF SECTION:	1.75" Compression Neodymium
AMPLIFICATION:	1600-2200W Module
FREQUENCY RANGE:	50-22,000Hz
CONTINUOUS/PEAK OUTPUT @1m:	134 + 3dB Headroom
DISTANCE FROM SEATS:	3-25m
IMPEDANCE:	LF 4/ MD 8/ HF 8 Ohms
DIMENSIONS:	W:450 x D:280 x H:1009mm
